PROFESSIONAL SUMMARY

Full Stack Developer skilled in Java, Spring Boot, and React, with experience designing and deploying production full-stack applications end-to-end — from relational schema design and secure REST APIs to responsive frontends and cloud deployment. Built and deployed a civic-tech platform with role-based authorization and an 18-endpoint API, plus a full-stack e-commerce application with integrated payments. Strong foundation in OOP, data structures, and clean, maintainable code.

SKILLS

Backend: Java, Core Java, OOP, Spring Boot, REST APIs, JWT Authentication, JDBC, Role-Based Access Control

Frontend: React.js, HTML, CSS, JavaScript, Responsive Design

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Build Tools: AWS, Maven, Git, GitHub, Postman, Cloudinary

Programming Languages: Java, Python, SQL

Core CS: Data Structures & Algorithms, Problem Solving, OOP Principles

PROJECTS

Jankalyan — Civic Issue Reporting Platform [Live Demo](#) [GitHub Repository](#)

Designed and deployed a full-stack platform for citizens to report and track civic issues, with role-based access for citizens and administrators.

- Architected a 6-table relational schema in PostgreSQL and designed 18 REST API endpoints covering complaint lifecycle management, user roles, and admin operations.
- Implemented JWT-based authentication with role-based authorization, enforced server-side across citizen and admin roles.
- Built image upload for complaint evidence using Cloudinary, with a responsive React UI for submission and tracking.
- Developed an admin dashboard for complaint triage, status updates, and reporting.
- Deployed the full application (frontend, backend, database) to production hosting.

Foodies — Full Stack Food Delivery Application *(Aug 2025 – Sep 2025)*

Built a full-stack food ordering platform handling browsing, ordering, and secure online payment end-to-end.

- Implemented JWT-based authentication and order management APIs in Spring Boot; built a responsive React.js frontend for browsing and ordering.
- Integrated Razorpay for secure online payments and used MongoDB for scalable storage of orders, users, and menu data.
- Deployed the application on AWS, covering hosting and database management.

Library Management System — *Java, JDBC, MySQL, File I/O*

- Built a console-based Java application with JDBC-driven CRUD operations against MySQL and file I/O for record backup.

EDUCATION

Bachelor of Science in Computer Science

Mumbai University — Navi Mumbai, Maharashtra | 2022 – 2025

CERTIFICATIONS & TRAINING

- Core Java & Spring Boot — IT Vedant (Dec 2024)
- Foundation with SQL — IT Vedant (Dec 2024)
- AWS Cloud Practitioner — IT Vedant (Oct 2024)
- Python for Web Development — IBM (June 2024)
- Masters in Full Stack Web Development with AWS — IT Vedant Education Pvt. Ltd. (Dec 2024)
